**Bexar County's Capital Improvements
Program Website Provides Transparency**

Bexar County's continued rapid population growth demands new, innovative infrastructure solutions. According to the U.S. Census Bureau, the county grew by roughly 300,000 people in the past decade; a trend that is projected to continue. Bexar County leadership recognizes that investing in infrastructure is the foundation for attracting new businesses, creating more jobs, significantly improving access to essential services, and enhancing overall quality of life for residents.

Consequently, on September 14, 2021, Bexar County Commissioners Court approved a ten-year \$690M Capital Improvements Program (CIP) designed to provide various types of long-term infrastructure support. The projects are separated into four main priorities: Transportation and Flood Control, Creeks and Trails, Parks, and County Facilities.

The CIP funds a total of 120 projects intended to stimulate the local economy, address rapid growth, and catalyze productive, transformational change in the community. In 2023, 35 projects are projected to begin, with 60 projects already in progress.

To provide residents with a central location to access project information and updates, a website has been created. The website's content will offer the public pertinent details and a place to go and keep up with current and upcoming projects in their precinct. Additionally, the site will provide prompt and thorough information about project bidding opportunities. Contractors and firms are invited to visit the website frequently for opportunities to work with the county.

Visit www.bexarcip.org to learn more about Bexar County's commitment to providing safe, innovative, and responsible infrastructure support for our community's future.
