

Bexar County Public Works Department Flood Control Division

Old Fredericksburg Road LWC (LC-27)
Drainage Project

June 16, 2015

Old Fredericksburg Road LWC (LC-27)

Project Overview

- The project consists of the construction of four (4) – 8'x4' concrete box culverts at an existing low water crossing along Old Fredericksburg Road near the intersection of Lost Creek Gap.
- The existing crossing receives upstream flows from the Lost Creek Subdivision development which currently floods Old Fredericksburg road causing dangerous driving conditions for passing motorists and pedestrians.
- The proposed culvert construction will allow safe, unflooded access for passing motorists and pedestrians during a rainfall event.
